

SCP SCIENCE introduces a bench-top fume hood for *DigiPREP MS, Jr.*, and *HP* sample digestion systems. Replacement air is drawn through the dual HEPA filter inlets offering cleaner ambient air. A powerful blow unit constantly pulls air into the fume hood and exhausts it out of the building.

- ◆ Integrated Lexan door for easy access of samples
- ◆ Filtered air with HEPA filter adaptors for cleaner air flow
- ◆ Manufactured with Lexan offering durable and see-through shell constructions: Assembled in minutes and requires no tools

Ordering Information & Specifications

DigiPREP Fume Hood System

Catalog Number	010-500-039
Construction	Corian bottom, Lexan walls
Size (in)	26W x 23.5D x 20H
Weight (lb)	49
